

What size inverter can be used for a 12v 10w power supply

How to calculate inverter size?

Using the Inverter Size Calculator is quick and easy. You'll need three inputs: Total Wattage (W): This is the total power consumption of all the appliances or devices you plan to run through the inverter. Safety Factor: A multiplier to ensure some buffer above your actual power requirement. Typically ranges from 1.1 to 1.5.

What is a 12 volt inverter?

An inverter is a device that turns the power from a 12 volt DC battery, like the one in your car or truck, into the 120 volt AC power that runs all of the electronics in your house. You can use one of these devices to power all sorts of devices in your car, but it's important to figure out how big of an inverter you need first.

What size inverter do I Need?

The size of the inverter that you need greatly depends on the anticipated usage. All the devices that you plan to run at the same time have to be added and then pick the inverter closest for that size (about 20% up). Inverters generally have two types of watt ratings, and they are: Make sure that the power size that you are looking for is:

How much wattage should I add to my inverter?

If you are able to find the specific wattages for your devices, you'll want to add them together to get a bare minimum figure. This number will be the smallest inverter that could possibly suit your needs, so it's a good idea to add between 10 and 20 percent on top and then buy an inverter that size or larger.

How much power does an inverter need?

The continuous power requirement is actually 2250 but when sizing an inverter, you have to plan for the start up so the inverter can handle it. Third, you need to decide how long you want to run 2250 watts. Let's say you would like to power these items for an eight-hour period.

How to size a 1500 watt power inverter?

A rule-of-thumb for sizing your 1500-watt power inverter is to combine the wattage of all the devices you are planning to use at the same time (don't forget basic necessities, like lights) and give yourself 20% headroom.
