Basics In the United States, most wind energy is commercially generated for delivery and sale on the grid. Wind projects vary in size, configuration, and generating capacity depending on ...

OverviewHistoryWind power densityEfficiencyTypesDesign and constructionTechnologyWind turbines on public displayThe windwheel of Hero of Alexandria (10-70 CE) marks one of the first recorded instances of wind powering a machine. However, the first known practical wind power plants were built in Sistan, an Eastern province of Persia (now Iran), from the 7th century. These "Panemone" were vertical axle windmills, which had long vertical drive shafts with rectangular blades. Made of six to twelve sails covered ...
