

Zambia imported outdoor power supply high power

Who distributes and supplies electricity in Zambia?

ZESCO Limited distributes and supplies electricity in Zambia. It was formed in 1970 after the Zambia Electricity Supply Act was passed in Parliament. The Corporation traces its origins to 1906 when a

Why are Zambia's Electricity exports rising in 2023?

Exports are also highlighted in this graph, with their sharp rise from 2020 to 2023 ostensibly fuelled by the additional output from Kafue Gorge Lower and Maamba, allowing Zambia to meet growing regional demand and earn much needed hard currency. Figure 2: Zambia's Electricity Generation for Major Power Stations compared with Exports (2014 - 2023)

Which Zambian hydropower plants generate the most electricity?

It reveals the pivotal roles played by Zambia's major hydropower plants - Kafue Gorge Upper, Kariba (North Bank and North Bank Extension), and Kafue Gorge Lower - as well as the Maamba coal-fired power station which together account for between 80% and 90% of total electricity generation each year.

How can Zambia improve energy security and preserving water resources?

Conclusion To mitigate future risks, Zambia must adopt a multi-pronged strategy to ensure energy security while preserving water resources. Investments in alternative energy sources such as solar power should be accelerated to reduce dependency on hydropower.

Is Zambia a regional energy supplier?

Electricity exports, meanwhile, have exhibited a less consistent pattern being roughly steady up to 2020 but have surged sharply in recent years. From 2020 onwards, electricity exports have grown by an average annual rate of 40%, signalling Zambia's increasing role as a regional energy supplier.

Does Zambia's energy sector face a balancing act?

By Dr Roy Moobola Zambia's energy sector faces a delicate balancing act. While increased electricity exports have earned vital foreign currency, such gains are juxtaposed against the real threat of unsustainable water usage at Kariba Dam.
